

Jet Nozzle Diffuser Building Product Information Sheet

Version 1.0 – Issued 11/06/24

Product

Product name	Jet Nozzle Diffuser
Product type	Diffuser
Product Identifiers	JND

Product description and intended use

- Jet Nozzle Diffusers are designed for applications where long throw distances and high volumes of air are required.
- The JND features a single orifice which can be adjust in all directions.
- The JND is made from spun aluminium and is available in either a mill or powder coat finish from the factory.
- The available nominal diameters are: 160, 200, 250, 360 and 400.
- The JND comes with a mounting plate for easy installation.

Relevant NZBC clauses

- Clause B2 Durability: Performance B2.3.1 (c) 5 Years
- Clause H1 Energy Efficiency: Performance H1.3.6

Contributions to compliance with NZBC

- **B2:** The lifespan of the JND will vary based on the environment it is installed in. For a standard HVAC installation, the JND would provide a durability of a minimum of 5 years. Excessively corrosive or harmful environments or exposure to fire, heat or water will reduce the lifespan of the JND.
- **H1:** When installed in a commercial building as a supply diffuser the JND must be designed to have a maximum pressure drop of 40Pa.

Relevant standards

- N/A

Conditions and limitations of use

- The JND should be specified by a suitably qualified engineer.
- The JND should be installed by a suitably qualified and trained tradesperson.

Warnings and bans

The JND is **not** subject to a warning or ban under section 26 of the Building Act 2004.
